

2013/2014

I WANT YOU

Catch Your Dreams

Cult Duramax Leader

Extremely smooth and 5x more abrasion resistant shock leader made of braided Dyneema®-Fibre to relieve the main line during far casts. A perfect combination with Climax CULT EXTREME!

Cult Duramax Lead Core

Double-braided lead core material that fits perfectly with water beds. Thanks to its double braiding, this leader is especially abrasion resistant and created for waters with rocky grounds, mussel beds and stubborn roots.

Cult Hunters Braid

Thanks to its special fibre treatment and camouflage surface sealing, this leader is especially abrasion resistant and made for waters with rocky grounds, mussel beds and stubborn roots.

Cult Heavy Metal Core

Instead of the normal lead core, a metal alloy, which does not burden waters, is used. The material is extremely abrasion resistant and easy to splice with the tight protective braiding. Ideal for fishing on water beds with obstacles.

Cult Carp Line

Best available raw materials for stability and increased life span. Specially formulated surface for extra abrasion resistance and cast ability. Unidirectional molecule structure for maximum breaking strain and controlled elasticity. Polymer additives for perfect suppleness and lowest possible memory. Linked molecules increased for up to 90% stronger knots. Computer controlled line diameter, density for consistent breaking strain and maximum reliability.

Cult Extreme

The perfect mainline for extreme situations that demand everything from your tackle. This handy and super supple line has got nothing in common with what you know about carp lines until today. An extra process in production adds incredible abrasion resistance exceeding other monofilaments by up to 12 times. Memory does almost not exist with the CULT Extreme line and a 20-25% elasticity allow to control a hooked fish in every situation. Its mattfinished throughout olive colour is really impressive and virtually vanishes in an underwater ambience.

Cult Combi Link Soft

Like CLIMAX CombiLink Stiff but with a supple and weighted coating that blends in naturally with the lake or river bed. Expose the core by peeling off the coating to produce a sinking hook-link with an extremely soft and flexible tip for shy carp.

Cult Combi Link Stiff

A unique rig-making line made from zero-stretch 100% Dyneema®-Fibre core, inside a stiff and weighted coating. Expose the supple core by peeling off the coating to get a sinking, anti-tangle hook-link with an extremely soft and flexible tip.

Cult Leadcore Leader

This abrasion-resistant lead core leader is heavy and virtually disappears on the lake or river bed. Equipped with a loop on one end and a swivel on the other end, it is suitable for both, inline and bolt rigs. The perfect choice for muddy water beds and wary fish. Combine with Climax CULT Hunters Braid as hooklink!

Cult Tungsten Leader			
OC200340	70	30	-

Cult Tungsten Leader

This ready-made highquality bolt rig features super fast-sinking Tungsten coating, which is non-toxic and blends in naturally with the lake or river bed. Its pliable skin is extra fishfriendly and in case of line breakage the Bolt Clip releases the lead when getting caught by obstacles. All materials are of the highest standard and will continue to produce the best results even after long-term use.

Cult Clear Leader

Featuring an extra-smooth, soft coat, this top-quality clear leader sinks and virtually vanishes on the lake or river bed. It is suitable for both in-line and bolt rigs. This leader is a „musthave“ in your tackle box and the perfect choice for clear water and shy fish.

Cult Leadcore Leader Safety Bolt Clip

This ready-made highquality bolt rig features super fast-sinking Tungsten coating, which is non-toxic and blends in naturally with the lake or river bed. Its pliable skin is extra fishfriendly and in case of line breakage the Bolt Clip releases the lead when getting caught by obstacles. All materials are of the highest standard and will continue to produce the best results even after long-term use.

Cult Chod Rig

This ready-made top-class rig meets the highest demands of the modern carp angler. The heavy tungsten coating slightly sinks into the weed and unsuspectingly presents pop-up boilies on top. The lead is far enough not to drag and hide the boillie into the lake bed. Non-Toxic and fish-friendly.

Cult Helicopter Rig

This ready-made, top-class helicopter rig has unique aerodynamic properties to give you a decisive advantage for casting extreme distances. The free rotation device ensures that your rig never gets tangled. The fast-sinking Tungsten coating is extremely fishfriendly and non-toxic.

Climax Select Fluorocarbon

SELECT Fluorocarbon has mastered a weakness that plagues most other fluorocarbon lines on the market: it has particularly high knot strength of about 80% and a suppleness that results in perfect casts and bait presentation. This is a very special line. Whether you are fishing in crystal clear water or stalking the most timid of fish, SELECT is the right choice. It has a similar rate of refraction to water so is practically invisible to fish, which dramatically increases your chances of success.

Climax Fluocarbon Wind-on Leader

The perfect leader - ready to fish! CLIMAX WIND ON LEADERS meet the toughest requirements of the world's best off shore competition anglers. They are easy to use, withstand the strongest fights and slip back easily through the tip guide when playing fish close to the boat for safer landing or releasing fish. Armed with CLIMAX FLUOROCARBON the Wind-On Leader is perfect for frequently fished waters whereas CLIMAX HARD LEADER virtually boosts the leaders breaking strain and is the right choice for real big fish... both are incredible abrasion resistant and durable. Make your choice!

Cult Shrink Tube

Careful steaming of the tube will shrink it by 50%. This makes it ideal for various rigs such as line-aligner rigs and many other. Should not be exposed to flame as this could harm the material.

Haruna Seamaster Leader

This exclusive leader material is capable of an enormous breaking strain – 95 kg with just 1.20 mm diameter – and nevertheless does not have problems with knots. Whether a self-knotted paternoster or a deep sea leader, you can completely rely on this monofilament.

Haruna Seamaster IGFA Quality

This monofilament Big Game line meets 100% of the IGFA (International Game Fish Association) standards on the precise calibration of international competition line and catches unbelievably good as well! Ask the pros!

Attributes:

- Exact calibration according to IGFA Standard
- Regulated elasticity, for strong hooking performance and buffer when playing the fish
- Optimal color for lowest possible under water visibility

Climax Fish Guard Curved 100522

Curved forceps

Features:

- Curved stainless steel jaws make handling and removing smaller hooks easy.
- 5" stainless steel forceps aid in holding, de-barring and removing hooks.
- Combination of ribbed and smooth jaw surface holds large and small hooks firmly.

CODE

OC300800

Climax Multi Link 100511

Universal attachment system holds hats, jackets, gloves, keys and many other items. Works on garments, vests, backpacks, luggage, belt loops, „D“ rings and more. Rubberized clamping jaws open easily to attach to garment. Won't cut or puncture fabrics.

Features:

- Locking padded jaws on the clamp grip firmly without puncturing fabric
- Swivel clip rotates 360° and snaps securely onto "D" rings, belt loops and other items
- Unique hinge design enables both the clip and the clamp to swivel independently, providing freedom of movement for attached items
- Rubber pads on the clamping jaws secure holding on all garments.

CODE

OC300820

Climax Zinger Plus 100510

A high quality, retractable corrosion-resistant measuring tape

Features:

- High quality
- corrosion resistant steel
- retractable 36" (1 m or 3 ft) measuring tape doubles as a convenient Zinger for holding nippers and forceps
- Measuring tape can be used to measure fish or tippet.

CODE

OC300830

Climax Tool Band 100512

This is a unique attachment device that extends to over 36" (1m) and always recoils to its original form. The swivel clip rotates 360° for added flexibility. Hold all your forceps and other tools securely.

Features:

- Multi-fastener is molded from engineering grade ABS and virtually indestructible.
- Rubber pads on the clamping jaws secure holding on all garments.
- High quality polyurethane tether extends to over 1 m.
- Swivel clip hooks onto "D" rings, belt loops, backpacks, tackle boxes and many other items.

CODE

OC300810

Climax Lighted Super Clip 100502

High-end allround tool – cuts monofilaments and braids!

Features:

- Embedded hook file on the bottomside of the nipper provides convenient hook sharpening.
- High quality honing material will sharpen the largest hooks and last a long time.
- An ergonomically designed, stainless steel fishing line cutting tool molded to comfortably fit in all hands. Includes a threader/eye cleaning tool that slides out and rotates when needed and retracts back into the body of the nipper when not. Never lose your threader/eye cleaning tool again!
- The embedded magnet provides a temporary holding area for hooks and flies during tippet/leader replacement.
